JOE ORDER # 5400 1

The following is the proposed revision of Procedure 1-D06-EPR-END- 03 based on discussions between END, DOE, RFO, and SMS representatives to address DOE, RFO comments on the volume of effluent released. This revision replaces lines 13 through 27 of page 7 from the 09/29/93 version of the above referenced Procedure

**NOTE 2** *These instructions apply to all outdoor operations at RFP. All divisions and their subcontractors must comply with this procedure. It is the responsibility of the Responsible Manager to ensure that proposed activities and changes to existing activities are reported to END in a timely manner.*

**NOTE 3** *To avoid unnecessary delays in activity schedules, it is recommended that the written notice generated in Step 5 1[1] be submitted to END at least 15 working days before the scheduled start of field activities*

**Responsible Manager**

[1] Notify END, in writing, of the following

- All proposed field activities before initiating field activities
- Any significant changes in area, scope, or character of existing field activities as soon as possible after such changes are identified

Such notification may address generic activities or a specific project. Significant changes include, but are not limited to, the following

- Change in the size or shape of an affected area
- Change in the location of an affected area
- Change in the character of field activities or activity intensity
- Change in the volume of an effluent release
- Change in the chemical character of an effluent release
- Change in the character of air emissions
- Change in the character, flow patterns, or volume of controlled surface water runoff
- Discovery of a species of concern in the activity area

**IF** it is unclear to the Responsible Manager whether a change is significant, **THEN** END should be consulted for a determination
